

# HONEY VARIETALS

## AVAILABLE – Jan 2023

Pricing – 500g Glass **\$8.50** - 1kg Glass **\$15.00**

### **GREEN MALLEE (500g & 1kg Glass Jars)**

The Green Mallee tree is a eucalypt tree found on the western plains of New South Wales and flowers every two to three years. The tree in a good flowering season produces high yields of honey. The honey is light in colour, of good density and has a mild pleasant flavour.

Our present Mallee honey was produced near Parkes.

### **BRITTLE JACK (500g & 1kg Glass Jars)**

The Brittle Jack tree is a eucalyptus tree found in the Central West of New South Wales. The tree prefers poorer soils and grows mainly on undulating country, is drought resistant and can handle frost and light snow. This tree is unreliable in producing honey but when it does its yields are quite high. The honey is amber (a bit on the dark side) with a strong pleasant flavour.

Our present Brittle Jack honey was produced in the Orange area.

### **BLUE GUM (1kg only Glass Jars)**

Blue Gum is a eucalypt tree found on the coast of New South Wales between Batemans Bay and Wauchope. It is not a reliable source of honey but produces excellent source of pollen for the beehive. The tree produces a honey that is medium amber and has a distinctive flavour.

Our present Blue Gum honey was produced near Batemans Bay.

### **EUCALYPTUS (500g only Glass Jars)**

The eucalypt tree is native to Australia. There are approx. 900 species which produce different coloured, flavoured and denseness honeys. Sometimes different species flower at the same time in the same forest making it too hard for the beekeeper to determine the type of honey that is being produced. This is called a natural blend. So we just call it eucalypt, not always the same but always a good flavour. Australia produces the finest honey in the world because of its eucalypt tree.

### **BROWN BOX (500g & 1kg Glass Jars)**

Brown Box is a eucalyptus tree that is found in the wheat belt of New South Wales where the summers are hot and rainfall low. The honey is amber in colour with a pleasant flavour. It naturally candies after some time.

This honey was produced in the Dubbo area.
