Pricing – 500g Glass \$8.50 - 1kg Glass \$15.00

The Beekeepers Inn Label

LUCERNE (500g Only - Glass Minimal Stock)

Lucerne (Alfalfa) is grown for hay or in some areas for pasture. Lucerne has a purple flower and choice honey, light in colour with a mild flavour.

This honey candies naturally and quickly.

BRITTLE JACK (500g & 1kg Glass Jars)

The Brittle Jack tree is a eucalyptus tree found in the Central West of New South Wales. The tree prefers poorer soils and grows mainly on undulating country, is drought resistant and can handle frost and light snow. This tree is unreliable in producing honey but when it does its yields are quite high. The honey is amber (a bit on the dark side) with a strong pleasant flavour. Our present Brittle Jack honey was produced in the Orange area.

GREEN MALLEE (500g & 1kg Glass Jars)

The Green Mallee tree is a eucalypt tree found on the western plains of New South Wales and flowers every two to three years. The tree in a good flowering season produces high yields of honey.

The honey is light in colour, of good density and has a mild pleasant flavour. Our present Mallee honey was produced near Parkes.

STRINGY BARK (500g & 1kg Glass Jars)

Stringy bark is a eucalypt tree, which has a rough, fibrous, stringy bark, which may extend for several metres. The honey darker in colour with a strong flavour.

This honey comes from Trunkey Creek, which is only an hours drive from The Beekeepers Inn.

GREY IRON BARK (500g & 1kg Glass Jars)

One of the most important trees on the NSW coast for honeybees. High quality honey
Mainly grown on the Eastern edge of the Western Plains, and some coastal regions. Flowering between September and November, this species can provide high yields. The honey is of excellent quality and has a light colour, good density and a pleasant mild sweet flavour.

YELLOW BOX (1kg & 500g Glass Jars)

Produced around the Cargo Cudal area 40km West of Orange. Light in colour and a mild, but bold eucalypt honey. *Regarded as Australia's best honey.*

BROWN BOX (1kg & 500g Glass Jar)

Brown Box is a eucalyptus tree that is found in the wheat belt of New South Wales where the summers are hot and rainfall low. The honey is amber in colour with a pleasant flavour. It naturally candies after some time. This honey was produced in the Dubbo area.
